The members of the International Longshoremen's Association who rebelled against its dictation during the harbor strike nearly a year ago and formed a new organization—the United Cargo Workers' Affiliation of Greater New York—were given the full support of the law in the Supreme Court yesterday when Justice McAvoy announced that he was convinced that the original organization had used illegal methods to prevent members of the newer body from working on the waterfront and that he would sign an injunction restraining improper interference.

In the application for an injunction his attention was directed especially to a letter from an official of the international association which stated that work on the waterfront unless he is as bons fide member of our organization. The corrected reading of the barometer (reduced to sea level) at New York on Wednesday, Dec 28, 1921, at 8 AM, as reported by the United States Weather Bureau, was thirty and thirty-nine hundredths (30.39) inches. This closely approximates seven hundred and sevenly-one and nine-tenths (171.9) millimeters. Captains of all vessels now lying in or near the ports of New York and Brooklyn can advantageously use the above official data for observing whether their own barometers require any considerable correction or adjustment.
